Excerpt: .the steam-blast, on account of the intermediate chamber, in the words already quoted on page 12. See also note, page 13. Page 29. The real power of the Sanspareil is to be estimated by its rate of evaporation, which was one-third greater than that of the Rocket, and thus, the Sanspareil, after allowing for its greater weight, was the most powerful engine brought forward at the trial. It is a common, but erroneous, opinion that the adoption of locomotive power upon passenger railways, and the consequent great results to which railways have attained, since 1829, are due to the success of the Rocket. The history of the Rainhill contest does not, however, warrant this conclusion, and it is not, indeed, improbable that the progress and success of the modern railway system would have been nearly the same had the Rocket never existed. Page 30. No particulars can now be obtained as to the coal burned and water evaporated in Hedley's engines; but an examination of the results attained by other engines, having boilers of like construction, justifies the presumption that the Wylam locomotives worked with greater economy of fuel than any others made prior to the Royal George, in 1827. f The following letter appeared in the Newcastle Weekly Chronicle, March 7th, 1874: --To the Editor of the Weekly Chronicle. Sir, Mr. William Hedley, father of Messrs. Hedley Brothers, who own collieries at Craghead and Shield Row, was unmistakably the inventor of the...
