Alphascript Publishing Feb 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - Agent Orange is the code name for a herbicide and defoliant contaminated with TCDD used by the U.S. military in its Herbicidal Warfare program during the Vietnam War. According to the post-war Vietnamese government, 4.8 million Vietnamese people were exposed to Agent Orange, resulting in 400,000 deaths and disabilities, and 500,000 children born with birth defects. From 1961 to 1971, Agent Orange was by far the most widely used of the so-called 'Rainbow Herbicides' employed in the herbicidal warfare program. During the production of Agent Orange (as well as Agents Purple, Pink, and Green) dioxins were produced as a contaminant, which have caused health problems for those exposed during the Vietnam War. Agents Blue and White were part of the same program but did not contain dioxins. 84 pp. Englisch.
