By Sanjib Chowdhury

John Wiley Sons Inc, United States, 2016. Hardback. Book Condition: New. 1. Auflage. 241 x 162 mm. Language: English . Brand New Book. Delves into the core and functional areas in the upstream oil and gas industry covering a wide range of operations and processes Oil and gas exploration and production (EP) activities are costly, risky and technology-intensive. With the rise in global demand for oil and fast depletion of easy reserves, the search for oil is directed to more difficult areas deepwater, arctic region, hostile terrains; and future production is expected to come from increasingly difficult reserves deeper horizon, low quality crude. All these are making EP activities even more challenging in terms of operations, technology, cost and risk. Therefore, it is necessary to use scarce resources judiciously and optimize strategies, cost and capital, and improve business performance in all spheres of EP business. Optimization and Business Improvement Studies in Upstream Oil and Gas Industry contains eleven real-life optimization and business improvement studies that delve into the core EP activities and functional areas covering a wide range of operations and processes. It uses various quantitative and qualitative techniques, such as Linear Programing, Queuing theory, Critical Path Analysis, Economic analysis,...
