

Noise and Vibration Mitigation for Rail Transportation Systems 2012: Proceedings of the 10th International Workshop on Railway Noise, Nagahama, Japan, 18-22 October 2010 (Hardback)

By -

Springer Verlag, Japan, Japan, 2011. Hardback. Book Condition: New. 2012 ed.. 239 x 163 mm. Language: English . Brand New Book. This volume contains the contributions to the 10th International Workshop on Railway Noise, held October 18-22, 2010, in Nagahama, Japan, organized by the Railway Technical Research Institute (RTRI), Japan. With 11 sessions and 3 poster sessions, the workshop featured presentations by international leaders in the field of railway noise and vibration. All subjects relating to 1. prospects, legal regulation, and perception; 2. wheel and rail noise; 3. structure-borne noise and squeal noise; 4. ground-borne vibration; 5. aerodynamic noise and micro-pressure waves from tunnel portals; 6. interior noise and sound barriers; and 7. prediction, measurements, and monitoring are addressed here. This book is a useful state-of-the-art reference for scientists and engineers involved in solving environmental problems of railways.

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Otis Wisoky**

This publication is great. It is full of wisdom and knowledge. You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).
